Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

I think this once again shows the government helps the rich get richer and the poor shall always suffer. Tax on phone service should be based on usage, like at the grocery store we pay a tax based on our total bill. Now why can't they do that on the phone bill or would that be too difficult, too fair, or maybe the government is incapable of thinking of something that would be "fair" for people of all financial levels.

Sincerely, Melissa Volquardsen 701 Little Beaver Dr Grimes IA
